

## Edge

The IBeX Edge is our entry level system ideal for the small office or remote office. The Edge is a solid state system with no moving parts to provide years of trouble free service. Supporting 6 FXO and 2 FXS ports the Edge provides both trunk ports (FXO) for you inbound and outbound calls and two analog (FXS) to support fax machines, cordless phones and other analog phone devices.

Offering all of the same calling features as our three larger systems, the Edge series is ideal for applications up to 20 phones and 10 concurrent calls.

Layered on top of the hardware platform is the IBeX operating system and software, a combination of a custom Linux distribution, telephone switching software, web based management and automatic updates via the Internet. The IBeX Edge system offers a combination of power, features and reliability that provides a VoIP platform that is unparalleled in the market.

Our Edge series system provides the following key features:
